

## **POSTERS**

*Posters will be available for viewing for the duration of the conference, with a formal poster session scheduled for 1800 – 1930 on Wednesday 17 September*

<b>Title and Presenter</b>
<i>Catch-and-release: Estimating and maximising the survival of released angler-caught fish, <b>Paul Butcher</b></i>
<i>Trawling in south-eastern Australian waters - key threatening process assessment, <b>Kerry Cameron</b></i>
<i>Using CT scans to explore the effects of Barotrauma on fish, <b>Sandra Diamond</b></i>
<i>A framework for developing appropriate sampling tools for designing large-scale and long-term research surveys, <b>Charles Gray</b></i>
<i>Surviving a sea-change: apparent survival of southern rock lobster (<i>Jasus edwardsii</i>) translocated to areas of higher productivity, <b>Bridget Green</b></i>
<i>Recreational catch and effort in a unique land-based pelagic gamefish fishery in south-eastern Australia, <b>Shane Griffiths</b></i>
<i>Conservation genetics of commercially exploited sharks, <b>Jessica Gwilliam</b></i>
<i>Geographic variation in reproductive traits of the western king prawn (<i>Penaeus (Melicertus) latisulcatus</i> Kishinouye, 1896), <b>Nadine Hackett</b></i>
<i>Potentially pathogenic parasites for sea-cage aquaculture of Australian fin fishes, <b>Kate Hutson</b></i>
<i>Observer-based research into commercial line fishing in NSW waters, <b>William Macbeth</b></i>
<i>Spatial variation in parasites of king threadfin (<i>Polydactylus macrochir</i>) and blue threadfin (<i>Eleutheronema tetradactylum</i>) in Australian waters; implications for fisheries, <b>Brad Moore</b></i>
<i>Optimising the stocking density of Australian bass: estimating carrying-capacity in freshwater impoundments, <b>James Smith</b></i>
<i>An overview of routine fisheries monitoring activities carried out by (or for) DPI&amp;F in Queensland, <b>Jonathan Staunton-Smith</b></i>
<i>The reproductive biology of <i>Chromis Hypsilepis</i> (Pomacentridae), <b>Samantha Thewes</b></i>
